

Auctions for Renewable Energy Support II

Friday, 26 June 2020
Webinar

4th AURES II Regional Workshop & Strommarkttreffen

Renewable auctions revisited – learnings from European experiences

Renewable energy auctions are by now a widely-used tool to allocate support contracts and determine the support level. In this webinar, we will discuss how countries, mostly in Europe, test new design approaches to reflect changing policy objectives and opportunities, such as increasing the market compatibility of RE support, procuring renewables and storage jointly, promoting energy communities, and enabling market clearing in “zero-subsidy” situations.

This is a joint workshop of the AURES II research project and the Strommarkttreffen network.

Webinar Format

Our speakers will begin with a short (max. 5-minute) presentation, followed by a (4-minute) Q&A.

Instead of name tags: Please enter your name and institution when joining the webinar.

We want to hear from you: please write your questions in the chat box.

Webinar Registration

Participation in the webinar is free. Please register via the Strommarkttreffen website at:

<https://www.strommarkttreffen.org/anmelden>

Please plan to join 5-10 minutes before the planned start to avoid connectivity bottlenecks.

Agenda

		Speaker	Institution
10:00-10:05	Welcome	Vasilios Anatolitis / Juliane Reimann	AURES II project coordinator Fraunhofer ISI / Strommarkttreffen
10:05 - 11:25	Presentations		
	Session 1: Impact of COVID-19 on auctions	Fabian Wigand	Guidehouse/ Navigant
	Session 2: Linking policy objectives with auction design	Ann-Katrin	Takon

	Speaker	Institution
	Hanke	
Session 3: Auctions and energy communities - risks, design options, and international experiences	Ana Amazo	Guidehouse/ Navigant
Session 4: Effects of auctions on renewables value chains	Craig Menzies	Factor
Session 5: Renewable energy revolution in Poland	Vija Pakalkaitė	ICIS
Session 6: India's first 24/7 RE-Tender linking renewables with energy storage solutions	Tobias Winter	GIZ
Session 7: Dynamic auctions under the new WindSeeG: test balloon for more or false start?	Dominik Huebler	NERA
11:25 - 11:30 Wrap-up	Fabian Wigand	Guidehouse/ Navigant
